Digital Marketing Fundamentals: Growth Architecture

Core Foundations of Modern Acquisition, Attribution, and Retention

THE GROWTH ARCHIVE | FIELD KNOWLEDGE EDITION 2026

CONFIDENTIAL & PROPRIETARY | LICENSED FOR SINGLE-OPERATOR USE

EXECUTIVE BRIEFING & METHODOLOGY

This digital resource synthesizes production experiments, campaign architecture,
and battle-tested systems deployed across high-scale performance marketing campaigns.
Every framework included here was verified against measurable CAC, ROAS, and retention.

CORE OBJECTIVES

1. Eliminate guesswork from campaign setup and scale with deterministic rules.
2. Optimize unit economics, attribution models, and conversion rates.
3. Execute standard operating procedures without relying on fragile hacks.

MODULE 1: THE UNIT ECONOMICS OF GROWTH

Understanding LTV:CAC ratios: A sustainable small business operates at 3:1 or higher.

Payback period: Strive to recoup customer acquisition cost within 30 to 60 days.

Blended CAC vs Platform CAC: Always monitor MER (Marketing Efficiency Ratio).

A/B testing statistical significance: Test one variable at a time with sufficient power.

Building high-converting landing pages: Hierarchy, proof, clarity, and reduced friction.

MODULE 2: RETENTION & LIFETIME VALUE ACCELERATION

The first 7 days define churn: Design an automated email onboarding sequence.

Segment customers by purchase frequency and average order value (RFM Analysis).

Re-engagement campaigns: Time win-back incentives to the average reorder interval.

Customer feedback loops: Review zero-party survey data to refine value propositions.

Net Promoter Score (NPS) tracking: Actively mobilize promoters for word-of-mouth growth.
